Education

The University of Sheffield **Expected Graduation: Jun 2028**

BSc Computer Science (Artificial Intelligence) with an Industrial Placement Year First Year Grade – 1st Class

Reigate Grammar School **Sep 2022 – Aug 2024**

A Levels: Computer Science, Mathematics, Physics, CyberEPQ Grades – A* A A B

Projects

Clash Royale Deck Analyser (HackSheffield10 Winner) | *Demo* | *Code* **Python** | **PyTorch** | **Tkinter**

- Developed a **Python-based application** to analyse and optimise Clash Royale decks by designing and training a **custom machine-learning classifier**, calculating **gameplay metrics**, and presenting insights through an **interactive GUI**.
- Won the **HackSheffield10 People's Choice Award** due to **strong user engagement**, the popularity of the game, and the **technical complexity** of the solution, with attendees recognising the **intuitive design** and **depth of the application**.

Uni-Connect (Team Project) | *Code* **Ruby** | **Sinatra** | **HTML/CSS** | **SQLite**

- Built a **Ruby/Sinatra web app** connecting **university mentors and mentees**, implementing **secure authentication**, comprehensive **profile management**, **mentor approval workflows**, **admin dashboards** and **database integration**.
- Collaborated in a **team** using **Git**, **Linux Command Line**, and **Agile/Scrum methodologies** to manage **version control**, track tasks, and iteratively develop features, demonstrating **teamwork** and **industry software development practices**.

Interactive Robot | *Code* | *Website* **JavaScript** | **HTML5 Canvas** | **CSS**

- Designed and built an **interactive robot application** using **JavaScript and HTML5 Canvas**, implementing **real-time user-controlled actions** like **movement**, **animation**, and **lasers** to demonstrate **interactivity** and **event-driven programming.**

Dungeon Dash | *Code* | *Game Link* **C#** | **Unity**

- Created a **2D dungeon crawler** in **C# using Unity**, with **procedurally generated dungeons**, **boss battles**, **intelligent enemy AI**, **ragdoll physics**, and **player mechanics**, showcasing **advanced programming** and **system integration skills**.

Gym Dashboard | *Code* **Java** | **Swing**

- Programmed a **Java Swing application** to analyse and visualise **gym member statistics**, including **BMI** and **workout frequency**, with **filtering** and **histogram visualisations**, leveraging **strong OOP**, **data handling** and **data analysis skills**.

Work Experience

Clarks **Jul 2025 – Sep 2025**

Sales Assistant *Crawley, UK*

- Delivered **strong sales performance**, regularly exceeding **£200 per shift** including a **£170 transaction**, by combining **product knowledge** with **personalised advice**, **upselling shoe-care products**, and providing **tailored recommendations**, while working collaboratively to maintain **high store presentation** and **standards.**

Digital Helpdesk – Reigate Grammar School **Apr 2023 – Apr 2024**

Volunteer, Digital Tech Committee *Reigate, UK*

- Collaborated with a **team of 5 volunteers** to troubleshoot **50+ student device issues** throughout the school year, developing **strong communication**, **patience**, and **problem-solving skills** while assisting **non-specialist users**, handling **multiple simultaneous requests**, and consistently ensuring **high user satisfaction**.

Leadership Experience

Engineering Without Borders – Global Engineering Challenge Week | Team Lead **Jan 2024**

- Led a **6-person team** over **5 days (45+ hours)** to develop a **community hub** for **Makers Valley**, producing an **18-page report**, **16-slide presentation**, and **design plan** including **workshop**, **childcare**, **market**, **solar panels**, and **gardens**.
- Applied **STEEPLE analysis**, **SMART objectives**, **risk assessment**, and **decision matrices** to create an **inclusive**, **sustainable**, and **ethically considered proposal** supporting **50+ residents** with **local revenue** and **renewable energy**.

Technical Skills

Languages: Java, Python, Ruby, JavaScript, SQL, HTML/CSS, C#, Haskell

Developer Tools/Skills: Git, Linux Command Line, IntelliJ IDEA, VS Code, Agile & Scrum

Libraries/Frameworks: Spring Boot, React, Ruby Sinatra, NumPy, Matplotlib
